Profile 2020

Let's Touch Future

Micron Technology that specialises in the design, supply, installation and maintenance of IT, CCTV, Wireless, Data Centre, Fire Security & Fire Alarm, Home Automation & Artificial Intelligence Solution, These systems are designed to suit customer's individual requirements. As we specialise in systems, our focused in-depth understanding of the latest technologies, enables us to designs systems and source products that can best meet the specific needs of our customers and the industry.

Micron Technology has been at the forefront of the IT Services, Telecom Services, Digital Security and CCTV Solution, Data Centre Solution, Home Automation & AI Solution, Experience, knowledge and innovation, ensures that we will satisfy the highest customer expectations. We help customers find the right solution at the right price. With over 10 years experience,... we guarantee satisfaction !

Our Service and Maintenance

CCTV & Surveillance Services

IT Services & Data Centre Solution

Telecom & Network Services

Home Automation & A-I Services

Electrical & Engineering Services

Micron Technology has completed many local and individual projects as well as demonstrated its capabilities in multinational and national companies. The outline below will help you better understand the details of our projects. We have arranged our projects in different categories.

Local and Small Business Solutions

Benglows, Apartments and Villas Solutions

Super Markets and Markets Solutions

Metroplatan Area Network Solutions

Industrial, Factories and Large Business Solution

Education Scetors Solution

Mobilink

BAHRIA TOWN
KARACHI

MICRON TECHNOLOGY Service Platform is a full range of solutions for maintenance, replacement, and remodelling of elevators, escalators, and ramps or walkways, whether for buildings without a elevator or for new installations providing services for hospitals, outdoor urban locations, offices, apartment buildings, etc

Commercial Building

Micron Technology installs, modernises, and maintains elevators and goods elevators for all types of commercial-use buildings: shopping centres, hotels, office buildings, and any type of space with high traffic demands and the need for maximum functionality.

ELEVATORS

Hospital Building

Elevators, bed elevators, and trolley elevators for hospitals offer all car sizes as well as supports and finishes to ensure the most hygienic conditions for patients and better usability and comfort for visitors, doctors, and other professionals.

Heavy Loads

Goods elevators can be electrical or hydraulic and can transport any type of load, regardless of how large or heavy.. Car elevators are provided with devices that facilitate centring the vehicle and allow it to enter and exit the elevator in a simple and convenient manner. Finishes are extra durable to support being scraped against by heavy loads without being damaged.

Appartments

Gearless elevators with or without machine room, to make housing accessible to everyone. Quiet elevators that provide comfort and convenience. Provided with the latest technology, incorporating LED lighting and automatic switch-off systems when elevator is not in use, thereby improving energy efficiency for the elevators and respecting the environment.

ESCALATORS

We provide our Clients with a variety of options for finishes, handrails, lighting, etc., in order to obtain the maximum level of integration with the architectural surroundings. For installations in airports, metro stations, and supermarkets, our escalators can be equipped with specific devices to adapt them for use with shopping or luggage trolleys. Escalators can also be adapted for outdoor installation and use, either in open air or covered locations.

RAMPS AND WALKWAYS

ORONA moving ramps and walkways have been designed to facilitate movement of people along long distances with maximum safety and comfort, either with or without shopping or luggage trolleys. Our solutions offer high service capacities and high performance along with silent operation.

Micron Technology provide Electrical & Mechanical Services.

Industrial Electrical Services

Programming/Engineering
Backup Generators
Lighting Retrofits
Equipment Relocation/Plant Moves

Power Distribution
Maintenance Contracts
Troubleshooting
Custom Control Panels

Machine Wiring
Temporary and Special Events Wiring
Equipment Installs
Solar Installations

Home and Building Electrical Services Design

Access control systems
Electrical equipment
Lightning systems and controls
Security systems

Active harmonic filtering
Emergency lighting
Power distribution equipment
Tunnel electrical works

Cable support and duct systems
Engine driven and photovoltaic power generation
Power factor correction
Uninterruptible power supply
